Intelligence

Discover the next era of workforce analytics

What analytics capabilities does Pontoon Intelligence offer?

Pontoon Intelligence offers a comprehensive solution for operational insights, predictive analytics, and market intelligence.

This all-inclusive suite of analytics tools, combined with our client-focused expertise, empowers our customers to decode market dynamics, evaluate programme effectiveness, control costs, and optimise supplier networks.

Crafted for clients with permanent and contingent talent strategies, Pontoon Intelligence is the proactive solution for workforce analytics.

- A cutting-edge platform encompassing reporting, dynamic business intelligence, and advanced analytics
- A comprehensive view of performance and activity for informed talent acquisition decisions
- Data-driven storytelling and interactive dashboards
- Unprecedented insights into talent supply, company demand, compensation, and more via market intelligence
- AI/ML integration and predictive analytics for intelligent decision-making, trend forecasts, delivery predictions, and beyond
- Elevated supplier optimisation, cost control, and talent quality improvement

Read about how we developed a forecasting model for our client's IT and engineering needs.

- 200+ candidates identified, screened, and code tested in 7 days
- 175 engineering roles filled ahead of schedule
- 94% forecasting accuracy
